

Corro-Protection

Introduction

Technical sprays are used in nearly all sectors of modern industry. These sprays are used for care and protection of surfaces, for cleaning, degreasing, dissolving and separating and are essential in daily business.

are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation.

We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

WEICON Corro-Protection lastingly preserves tools and precisions parts made of metal for inside storage and overseas shipping, with a dry, waxy protective film.

Applications

- Safe corrosion protection of plain, unlacquered metal parts through a transparent protective film
- Inside storage of work pieces
- Corrosion protection in case of overseas shipping
- Preservation of tools and precision parts

As required, the protective film can be removed easily (e.g. with WEICON Cleaner Spray S).

Technical data

Colour	colourless
Odour	solvent
Temperature resistance	-20 to +50 °C
Shelf life (minimum)	24 months
Special features	On a wax basis

Processing

Clean and degrease surfaces with WEICON Cleaner S. Bring Corro-Protection to room temperature, mix it to a homogeneous liquid and brush or spray (e.g. with Pressurized-Air Spray Can) onto the parts to be protected. The material is finally cured after approx. 3-4 hours with room temperature. To obtain a higher corrosion protection, several layers can be applied. The protective layer can be removed with WEICON Cleaner S.

Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50°C.
